

Name: _____

Wedding Date: _____

CUSTOM SIZE MEASURING GUIDE.

Your wedding gown will be custom-crafted to fit your exact measurements, offering a more precise fit than a standard-sized gown. We emphasize the importance of precise measurements as the foundation for a flawlessly fitting wedding gown. For this reason, we suggest having your measurements taken by a friend, family member, or a professional tailor to guarantee accuracy. Keo Bridal assumes no liability for incorrect measurements; it is the customer's responsibility to ensure the accuracy of their size order. Should you have any inquiries or need help with the measuring process, please feel free to contact us.

For your custom size gown, it is imperative that you submit your measurements via our website on the same day as you place your order.

1. Hollow To Waist
Place the tape measure at the hollow center of your collarbone down to your waist.

2. Shoulder To Shoulder
Measure across your collarbone, from one shoulder point to the other.

3. Bust
Position the tape around the fullest part of your bust, ensuring it crosses over the nipple line.

4. Under Bust
Position the tape measure right under your breasts typically where the bra band sits.

5. Bra Cup Size _____

6. Waist
Place the tape around your natural waist. Located just above the belly button, just below the rib cage.

7. Low Waist
Place the tape measure between your waist and low hip! This is usually over the tummy or "love handles".

Name: _____

Wedding Date: _____

8. Hip

Wrap the tape measure around the fullest part, of your hips (generally around your buttocks).

9. Thigh

Measure around the fullest part of your thighs.

10. Waist To Knee

Measure down from your natural waist to the top of your knee.

11. Waist To Hem

Measure from your waistline down to where the hem of your gown will end. Wedding gown hems are typically 1/4' inch from the ground.

12. Hollow-To-Hem

Stand straight, look forward, and keep your heels together. Place the tape measure at the hollow of your collarbone, extending it down to where the hem of your gown will end. Wedding gown hems are typically 1/4' inch from the ground.

13. Heel Height
